

Product Certificate Number	20618-3-CER		
Applicant	ABB Power Grids Belgium n.v. – Power Quality Products Allée Centrale, 10 – Z.I. Jumet B-6040 Charleroi, Belgium		
Series	PQstorl Series		
Models	PQstorl-M PQstorl-WM PQstorl-C		
Type of generating unit	Battery Energy Storage Inverter		
Technical Data	See page 2		
Software version	v0.1-Rev10, / DSP V56.1 rev 34		
Network connection code	ENA-EREC G99 Issue 1 Amendment 5 November 2019. Requirements for the connection of generation equipment in parallel with public distribution networks on or after 27 April 2019.		

Having assessed the report number: 20618-3-TR performed by CERE (Accredited Laboratory N^o 5314.01) based on the requirements of the EN ISO/IEC 17025: 2017.

The above-mentioned generating unit complies with the requirements of the:

ENA-EREC G99 Issue 1 Amendment 5 November 2019. Requirements for the connection of generation equipment in parallel with public distribution networks on or after 27 April 2019.

This certification is according the CERE internal process PET-CERE-09 Rev 27 based on the requirements of the EN ISO/IEC 17065:2012. For this certification process the conformity assessment activities were based on:

- Testing of production samples selected by CERE.
- Audit of quality system according ISO 9001 with certificate number: BE05/051523 issued by a certification body accredited according EN ISO/IEC 17021.
- Inspection of the manufacturing process.

Madrid, August 05, 2020. This certificate is valid until August 05, 2023

Miguel Martínez Lavin Certification Manager

Technical data

PQstorl:

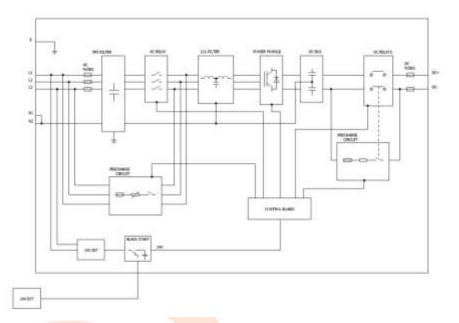

Specification	PQstorl - M	PQstorl - WM	PQstorl - C
	Module	Wall-mounted	Standalone cabi- net
Electrical characteristics			
Connection method	3-wires		
Network voltage (+/-10%)	208 - 415 V		
Network frequency (+/-5%)	50		
Rated power (at 400 V)	30 kW		
Line current rating per base unit (A)	40 A		Full cubicle: 40 A 600 A
Inverter technology	Three level inverter		
Modularity	Up to 16 modules can be combined. Different module ratings are allowed		
Equipment losses	<2% of the equipment power typically		
Inverter characteristics			
DC voltage (min)	620 V for 3W application (note 1) Note 1: Limited High voltage ride through support at lower DC voltage		
DC voltage (max)	830 V (890 V with reduced power)		
Re <mark>sp</mark> onse time	<1 network cycle		
Pr <mark>o</mark> gramming/ communica	tion		
W <mark>i-</mark> Fi communication	Webserver on smatphone or computer for sinple diagnostics and parameters setup		
USB	With dedicated opc	ional softwar <mark>e (ser</mark> vic	ing / pro <mark>grama</mark> ming)
НМІ	7-inch color TFT screen (800 x 480 pixels) 198 x 141 x 40 mm IP65 front side / IP20 backside CAN 2B (internal) - RJ12 Ethernet (Modbus TCP) - RJ45) USB 2.0		
Digital I/O on HMI	2 insulated digital input - +24 V (AC or DC) 6 digital NO output - 250 Vac/ 5A (one common polatity), dry contacts
